

SC FSDO FAAS Team presents:

May 2021 Topic of the Month - Owner/Pilot and Mechanic Relations

The General Aviation pilot/owner/operator may have no idea what to expect from their mechanic. Most pilots think airworthiness issues are their mechanics' problem and that owners are not responsible for anything airworthy about their aircraft. They also have a misconception that mechanics are all created equal, no matter what they charge for services. The fact is that some mechanics, whether knowingly or not, cut corners to save a buck. This presentation contains tips for aircraft owners and operators to ask when choosing a new mechanic or re-evaluating their present mechanics.

Prior to attending this safety seminar, please review and abide by current CDC, State and Local health guidelines.

Directions: See map for directions. Once you enter the FBO, the multi-purpose room is located to the left.
